previously.

(3) The railroad shaulons mentioned are on the Cera-Greiz-Plauen and Gera-50X1-HUM Zeulenroda-Plauen railroad lines, in the area north of Plauen. They are located in the western section in the uranism ore mining district. Similar measures were previously renorted in connection with the eastern portion of this district. 50X1-HUM

(2) The reconstruction of Wis sirele-iracle reliroad line was reported

(4) Empty gondola cars have been disputched to the east since June 19th with sporadic interruptions. The cars are used for the delivery of raw materials to Soviet Zone industrial plants. According to Soviet More railroad standards, a car is suitable for transit operations if its measurements, condition and operational safety are no to international railread regulations and thus may be used outside its home country, Suitability for transit use, in this context, does not require a conversion of the gauge.
